User Story Review Summary

Parameter | **Description** | **Score (out of 20)**

-----|-----|-----

Clarity | The story lacks a clear description of the desired outcome and related functionality. | 6

Completeness | Acceptance criteria are missing, which makes it difficult to understand the requirements. | 0

Business Value Alignment | The story does not clearly reflect tangible healthcare value, such as patient safety or compliance. | 4

Testability | It is challenging to derive test cases from the provided story due to its ambiguity. | 8

Technical Feasibility | The story lacks information about system constraints and integration requirements. | 10

Overall Score: 28 / 100

Improvement Areas:

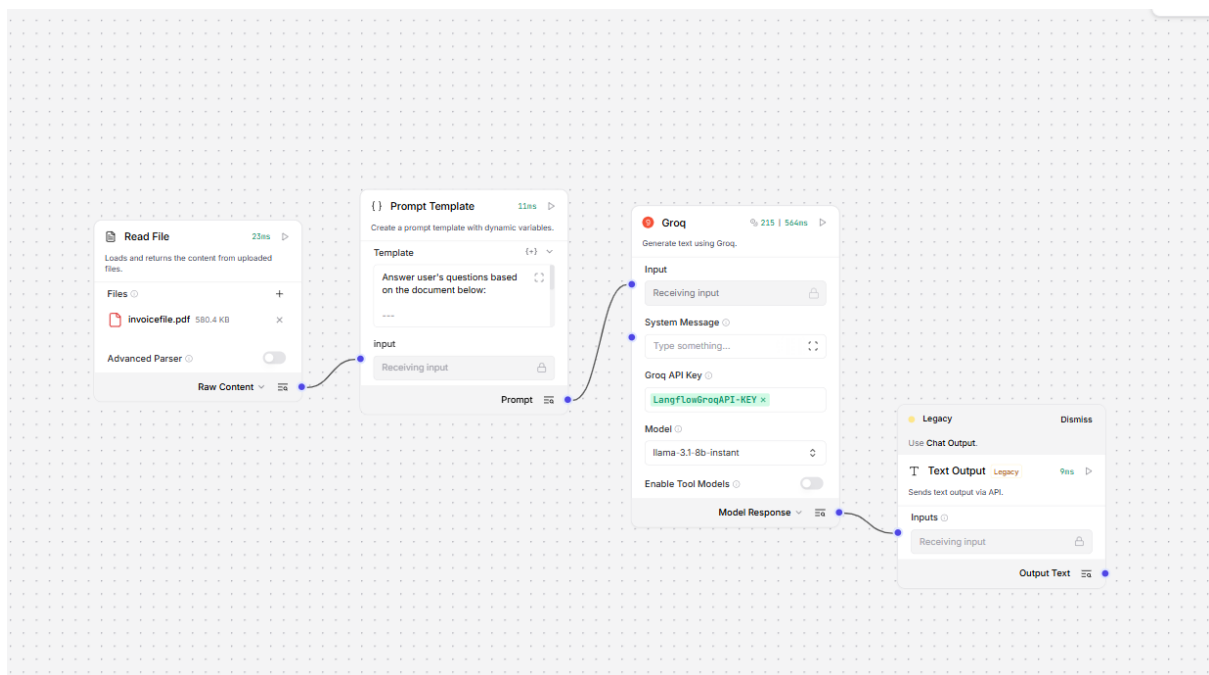

1. **Add a clear description of the desired outcome:** Provide a detailed explanation of what the "masters others approval setup" functionality entails, including its purpose and benefits.

2. **Define acceptance criteria:** Establish specific, measurable, achievable, relevant, and time-bound (SMART) criteria to ensure the functionality
